

Understanding call_indirect

Ross Tate

Test 1

```
function foo() : funcref {...}
```

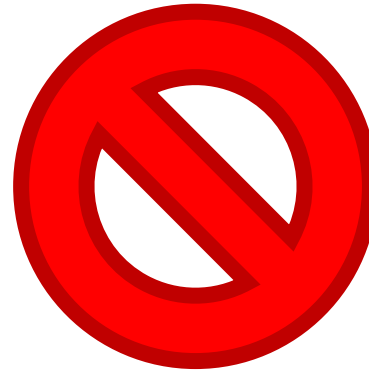

```
call_indirect ([] -> [anyref]) $foo;
```

Test 2

```
function foo() : funcref {...}  
export foo : [] -> [funcref];
```

```
import foo : [] -> [anyref];  
call_indirect ([] -> [anyref]) $foo;
```

Test 3

```
function foo() : funcref {...}
```

```
foo_ref := ref.func $foo;
```

```
export foo_ref : funcref;
```

```
import foo_ref : funcref;
```

```
table.set $t 5 (global.get $foo_ref);
```

```
call_indirect $t ([] -> [anyref]) 5;
```
