

## Discussion: streamlined process for simple proposals

September 27, 2021

# Agenda

- ▶ Background
- ▶ Proposals
- ▶ Process
- ▶ Discussion

# Background

- ▶ GH issue: [WebAssembly/meetings#857](#)
- ▶ Overall idea is that it *might* make sense to simplify the process for proposals that are limited in scope
- ▶ There is a similar process in TC39

# What proposals should qualify

Considerations:

- ▶ Number of instructions/items
- ▶ Relationship between the items
- ▶ What kind of items
- ▶ Whether or not new semantics are introduced

# How to streamline

- ▶ Streamlining earlier phases
  - ▶ "Informal spec text can be described in the initial presentation"
  - ▶ This is what TC39 does
- ▶ Streamlining later phases
  - ▶ "If enough consensus we can get to standartization faster"

# Discussion

- ▶ Should we adopt a streamlined process?
- ▶ What kind of proposals we want to be eligible and what should the process be?

Thank you
